Your Financial Independence is at the Heart of Everything We Teach

Today's 'Stock Traders and Investors Free Weekly Wrap' Article is based on an EXTRACT from Edition 331 of the Mentoring style '*Investing & Online Trading*' Newsletter

New! JB Premium Charts for USA

The chart screenshots featuring Jim Berg's JB Volatility Indicators in our weekly '*Investing & Online Trading*' newsletter are produced using JB Premium Charts, which Jim and many other traders have used for several years.

Until now, this low cost [JB Premium Charts package](#) comprised the charting program with ASX data and ASX history.

For those Australian traders wanting to trade US markets, the USA data has been and remains an optional add-on.

Today, for other traders around the world who wish to mainly trade the American market, we announce the release of [JB Premium Charts for USA](#).

This new package consists of:

- ✓ JB Premium Charts, including Jim's Indicators:
 - JB Blue Bar Volatility Entry Signal
 - JB Volatility Trailing Stop and
 - JB Profit Taker
- ✓ 12 months subscription to JB Premium Data for USA
- ✓ Free Bonus Historical data for USA since 1985 (*worth \$99*)

As part of this package, this week Jim Berg has also created a 19 page document on how to install and use JB Premium Charts for USA. A link will be sent to you to download these Instructions after you order.

For those choosing the new USA package, JB Premium Data for ASX is available as an optional add-on.

An extra note for Overseas Members: The price shown includes 10% Australian GST which will be deducted for those living outside Australia at the check-out stage.

Now your charts can look the same as Jim Berg's.

How to Determine When the Market is Really Trending

By Larry Levin

In our [‘Investing & Online Trading’](#) Newsletter we primarily focus on Jim Berg’s trading strategies. From time to time we also include input from some other recognised traders from around the world. [Larry Levin](#) is a professional futures trader. He has been in and around the S&P 500 futures pit at the largest futures exchange in the world; the Chicago Mercantile Exchange (CME), for almost 20 years. We thank Larry for his commentary.

‘ How often have you looked at a chart and tried to determine whether or not the market is really trending? How many times have you been fooled by your Stochastics or RSI indicators?

How many times have you sold because your oscillators were screaming overbought then watched the market dip a little and then continue higher, stopping you out for another loss? One of the most important things you are probably trying to figure out with any given market is if it is in a trend, and in which direction that trend is moving.

Find the trend and make friends with it

Swimming upstream is difficult, and that kind of battle is probably why you’ll often hear traders say, “The trend is your friend.” But spotting a real trend can be tricky, especially for first time traders and chart observers. You don’t need really fancy calculations or trading software to spot a trend in a market, and if you find it, don’t fight it.

Guess who bought the dip? That’s right, the floor traders and the other professionals

If a market is really trending, there will always be reactions against the prevailing trend. Those are the signals most floor traders love. They know that many investors in the general public will fall for the “fade” nearly every time. So how do you know whether or not what you are seeing is a real trending market or not?

The basics are very simple. A market in an uptrend will likely have higher highs and higher lows. The opposite is true for a downtrend. Lower highs and lower lows tell you when the market is in a downtrend. You never want to go against these situations.

TWO IMPORTANT TRADING RULES:

- 1) We never get long or buy in a downtrending market.
- 2) We never sell or go short in an uptrending market.

It’s just like stepping in front of a freight train. .

A market on a move higher will attract new buyers and selling forces will help establish higher highs. When the price dips, more buyers will come in on what they perceive as a value entry point, delivering those higher lows. On the downside, selling pressure will cause lower lows and any move above those results in more sales, topping off those lower highs.

Find support and resistance and find trading opportunities

Once you have determined the overall trend, you can look for support and resistance points. Knowing these price levels can help you follow the trend, buying on dips in a market that might be trending higher or selling on pops when the prevailing trend is likely lower. It doesn’t get any better than that! Best trades to you,

Larry Levin, President & Founder- Trading Advantage

Disclaimer: Futures and Options trading has large potential rewards, but also large potential risk. You must be aware of the risks and be willing to accept them in order to invest in the futures and options markets. Don’t trade with money you can’t afford to lose. Nothing in Larry Levin’s website shall be deemed a solicitation or an offer to Buy/Sell futures and/or options. No representation is being made that any account will or is likely to achieve profits or losses similar to those discussed on his site. Also, the past performance of any trading methodology is not necessarily indicative of future results.

Jim Berg's New 1 Day Volatility Workshops in Melbourne, Sydney and Gold Coast

Early Bird Special - Only 1 Week Left

Are you totally confident on how to trade and invest in the market – or maybe you could use some help – from a trader with 30 years of experience?

This month we announced Jim will present a one day **'hands-on' JB Volatility Workshop in Melbourne, Sydney and the Gold Coast** – to make it easier for traders and investors to learn all the details of his trading rules – at locations closer to home for some.

This event is suitable for complete beginners, through to experienced traders and investors.

New attendees will receive a copy of Jim's Home Study Course Manual before they attend, together with FREE copies of our two new DVDs, planned for release soon:

- *'Introduction to trading and investing in the stock market'* DVD and
- *'Money and Risk Management'* DVD

“ Thanks for all the support you provide. I decided to adopt Jim's methodology and this will be a good refresher/update.

I believe in learning from those with more experience than me, and Jim's approach matches my style.

Richard Watkins, private trader & previous graduate,
Nov.2011

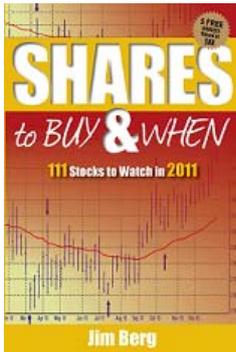

Only 1 week left! Until 30 November only, you can also take advantage of our **special early bird** facility and secure your place with **6 Interest-Free Easy Payments**.

Clearance Sale – Save \$22

Now you can save on Jim Berg's 2011 book '*Shares to Buy & When*'.

Jim says:

" Many of the companies in this book will probably be recommended again by 'experts' for 2012. This book provides a valuable reference tool from which it is easy to work out the yearly return and compare returns when applying a disciplined trading strategy."

While stocks last, the publisher has reduced this educational resource to only AU\$13.50, including delivery in Australia, **so you save \$22.**
