Your Financial Independence is at the Heart of Everything We Teach

Your Free Wrap today is based on extracts from this week's Edition 587 of Jim Berg's 'Investing & Online Trading' Stock Report

"On the Edge of an Important Cusp" By Jim Berg and John Atkinson

Below we recap the last few months:

In May the ASX200 (XJO) switched to a rising trend, but as the Banking Index was not following, in his 'Caution Updates' Jim flagged his concerns and decided NOT to re-open our Report's notional portfolio and to wait for confirmation by the Banks.

The portfolio has remained closed since.

In June we explained the potential for a rally in July. That rally did eventuate and we achieved a 90% success rate of 9 out of 10 profitable trades in our Trading Signals Service ([see Editions 579-582](#)).

During late July- late August:

- 1) Cracks started to appear so we showed in our mentoring-style '[Investing & Online Trading](#)' Report how a few Signals and other shares had gapped down with unusually extreme volatility
- 2) We flagged the potential for a correction during September to October and the potential for a 'Christmas rally' after the October anniversary of 'Black Monday' in USA. Later, we added a caution for the potential for additional volatility around Nov 8th due to this year's USA election.
- 3) On 23rd August we announced to [Signals Members](#) that we would cease posting any new entry Signals until at least after that anniversary.
- 4) After reviewing feedback received, we amended our '[Important Strategic Announcement](#)' to Signals Members on 24th August to say that we would post new entry signals for Members' research only and

"...any Members who wish to continue trading and investing do so against the current General Advice of the Proprietors".

3 days later, in [Edition 578](#), we published this announcement, along with charts to explain more.

Since that *Important Strategic Announcement*:

- 1) Our current series of '*Closed Trades in September*' articles which we are currently publishing in our weekly Report shows that:
 - a. Trading with daily charts gave better results than waiting longer for weekly stops to activate
 - b. Ceasing trading and investing from 25th August was prudent and provided even better results
- 2) By October 2016, many more cases of large falls and notional losses occurred for those who chose to continue "*against the current General Advice of the Proprietors* " and the notional trades became a sea of red, as we will report in next month's series of articles

In Australia we believe we **are now on the edge of an important cusp**, as shown in Jim's Caution Update in this [week's Edition on Page 13](#):

- 1) While still in a falling trend, in recent weeks the Banking Index has shown the start of a turn around and is getting closer to becoming a rising trend.

If the XJO continues in a rising trend, then this will allow Jim to re-open this Report's notional portfolio. We will also continue to teach our Members how to trade and invest in rising trends.

- 2) However, after the September-October correction, Jim has flagged this week that the XJO is now showing signs that it may itself be close to switching to a falling trend.

If so, we will teach our Report Members how to capitalise on that switch and make money in a falling trend, *without using leverage*.

Add in the fact that we are now only days away from the USA election.....

So as we said above, we are now on the edge of an important cusp.

The market could go either way from here, so to find out more on how and when Jim will trade and invest in this market, watch this space in our [weekly mentoring-style Report](#) for the latest updates and developments.

Customer Caution Notice and Copyright

General Advice Warning: This document is a tool to assist you in your personal judgment. It is not designed to replace your Licensed Financial Consultant or your Stockbroker. In preparing this document, Jim Berg as Authorised Representative (AR No. 322724) and ShareTradingEducation.com ("STE"), as Corporate Authorised Representative (CAR No. 322726) of Longhou Capital Markets Pty Ltd ("LCM") AFSL 292464, have not taken into account the investment objectives, financial situation and particular needs of any particular investor, because readers come from diverse backgrounds, with diverse objectives and financial situations.

Because of that, the customer should, before acting on the advice, consider the appropriateness of the advice, having regard to their objectives, financial situation and needs; and, if the advice relates to the acquisition, or possible acquisition of a particular financial product, the customer should obtain a Product Disclosure Statement or offer document relating to the product and consider the Statement before making a decision about whether to acquire the product.

As this information is of a general nature only, you should seek advice from your broker or other investment advisors as appropriate before taking any action. In particular, this may include consultation with your Taxation Advisor regarding any possible taxation implications from selling stocks, shares, Exchange Traded Funds (ETFs) or other instruments. (ShareTradingEducation.com P/L is not a registered tax agent and any reference to tax is incidental and must be confirmed with a registered tax agent). The decision to trade and the method of trading is for the reader to decide.

STE and/or LCM and its officers, employees, agents, associates and alliance partners ("Associates") may have or may obtain an interest in the securities referred to in this letter and will receive commissions, brokerage and other fees from dealing in the securities or advising in respect of the proposed listing of the securities. LCM and/or STE believe that the information contained in this letter was accurate at the time it was compiled.

Performance Caution: **Direct investing in the stock market can result in financial loss.** The past performance of STE products is not and should not be taken as an indication of future performance. Caution should be exercised in assessing past performance. STE's service, like all other financial services, is subject to market forces and unpredictable events that may adversely affect its future performance.

Jim Berg and STE believe that the information contained in this document was accurate at the time it was compiled. However, results reflect absolute trading stop loss discipline. Any projections made in this document are estimates only and no representation is being made that any account will or is likely to achieve profits or losses similar to those shown. Stock tips, buy or sell recommendations are not provided in this document.

All case study trades are notional examples using reasonably attainable entry and exit points. Results reflect absolute trading stop loss discipline. Unlike an actual performance record, simulated results do not represent actual trading. Also, since the trades have not actually been executed, the results may have over or under compensated for impact, if any, of certain market factors, such as lack of liquidity
