Mentoring-style 'Investing & Online Trading' Stock Report

3rd Profit Target Achieved in 6 Days

By John Atkinson

In our weekly mentoring-style '[Investing & Online Trading Report](#)' we teach our Members how to use Jim Berg's profitable strategies and unique JB Volatility Indicators to trade stock and share markets of the world.

Each week we include:

✓ **Jim's own watch lists for the USA stock and Australian share markets:**

These feature those stocks and shares which have passed most of Jim's proven '*Weight-of-Evidence*' rules, so that Report Members can watch them over the next 1-2 weeks and check if the final entry rules are triggered

✓ **Two notional short term trading portfolios for the USA & Australian markets**

By following Jim's notional trades '*from cradle to grave*' over a month or two, these portfolio examples help our Report Members to

- ✓ Build their market skills and confidence and
- ✓ Understand precisely WHEN to Buy and, more importantly, when to SELL.

Also, for Australian investors and traders only, we offer Jim Berg's [Australian Signals Services](#).

Every night, after the market has closed, expert trader and investor Jim Berg and his team scan the Australian share market for potential Trading and Investing Entry Signals on behalf of our Signals Members, ready for the following day.

These shares need to pass all of Jim's documented '*Weight-of-Evidence*' Rules before they are posted as confirmed Entry Signals.

The latest prices and stop loss values are also updated in a Master Log of all '*open*' trading '*positions*' in the Australian share market, so that Signals Members can watch the management '*real time*' of all '*open*' Signals.

Each night we then send our Signals Members the results of our comprehensive analysis - in the form of

1. An **Entry Log** - showing any new **Entry Signals**, along with suggested Maximum Buy Prices, Initial Stop Loss values, example position sizing, Money & Risk Management factors etc. - ready for the next day
2. An **Exit Log** - showing any new **Exit Signals** for the next day
3. A **Master Log** - showing, for all Signals, the latest closing prices, open profits/losses, stop loss types, stop loss values, suggested trading profit target values, dividends, etc.

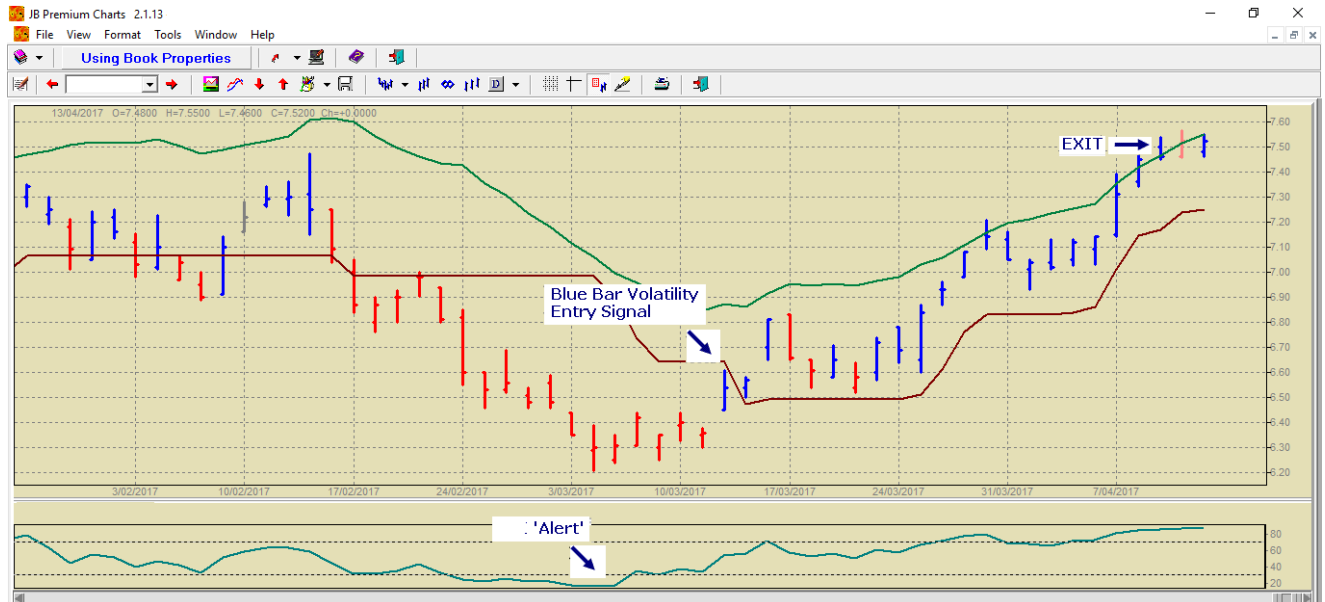

The aim of Jim's [Australian Investing Signals](#) is to '*let profits run*', so these are monitored using *weekly charts* (and also a daily '*Hard Stop*' and '*Emergency Stop*' in case the market stumbles).

Customer Caution Notice Jim Berg and John Atkinson are Authorised Representatives (AR Nos. 322724 and 1251439) and ShareTradingEducation.com Pty Ltd is a Corporate Authorized Representative (CAR No. 322726) of Longhou Capital Markets Pty Ltd, Australian Financial Services Licence AFSL 292464. Information provided in this document is of a General nature only. Examples from the Australian and USA markets are provided to demonstrate that Jim Berg's principles may be used globally. This educational material is from an Australian source and complies with Australian law and not necessarily any other (local) law. The past performance of ShareTradingEducation.com ("STE") products is not and should not be taken as an indication of future performance. Caution should be exercised in assessing past performance. In contrast, each of his trading trades in both his [weekly mentoring-style Report](#) and his Trading Signals Service:

- ✓ Are managed using *daily charts* and
- ✓ Jim's aim is to target short term profits of about 10 to 15% in about 1-2 months and to minimise losses to under 10% (preferably closer to 2-5%).

For example, in his [Australian Trading Signals Service](#) on 11th April, Jim Berg achieved his 3rd short term Profit Target of around 15% in 6 trading sessions#, with the first two featured in [last week's Free Wrap](#) and the latest shown in the chart below:

{* **Please Note:** All percentages shown are % of the amount invested per trade. Stock codes and details of Jim Berg's Trading Rules are excluded from Sample Editions of the Report. They are presented in full to subscribing [Report Members](#).}

In this latest example, our Logs show:

- i) Trading Signals Members were notified on Tuesday 14th March that Stock 3* had given a **JB Blue Bar Volatility Entry Signal** that day
- ii) That night, their Entry Signals Log for Stock 3* included:
 - Suggested Maximum Buy price of \$6.61
 - An Initial Stop price of \$6.17 , with initial trade risk of **-6.7%** (i.e. *less than Jim's limit*)
 - No of shares to buy for a \$12,500 notional position size
 - Portfolio Risk for a notional \$100k portfolio of **-0.89%** (i.e. *again less than our target limit*)
- iii) Jim's suggested entry price was met the following day, with a notional entry price at \$6.54 on 15th March 2017

- iv) In their Master Log that night, Signals Members were given a suggested Profit Target to place their SELL Orders in the market at \$7.52
- v) Stock 3* closed above the Profit Taker on 10th April, so Signal Members were notified that night and suggested to reduce their Profit Target to \$7.19 (as per Jim's profit taking Rules taught in our '[Investing & Online Trading Report](#)' and his [Home Study Course](#))
- vi) The next day, 11th April, Stock 3* opened higher than the revised Profit Target, so those Signals Members who had followed our notifications exited at \$7.50 on the Open at a **14.7%** profit target in **3.9 weeks**.
- ✓ This result fits; "...Jim's aim is to target short term profits of about 10 to 15% in about 1-2 months and to minimise losses to under 10% (preferably closer to 2-5%)" as mentioned above.

In the first 2 weeks of April, a total of 4 notional Trading Signals trades were closed with:

- ✓ **No losses** and
- ✓ 4 notional profits of **+5.5%, +14.7% +15% and +16.4%**
- ✓ In 7.6, 3.9, 9.3 and 7.0 weeks respectively, i.e. average time of 7 weeks or **1.6 months**.
- ✓ Assuming \$12,500 position sizes for each trade, these equate to individual notional profits (excl. dividends & transaction costs) of **+\$685, +\$1,835, \$1,873 and \$2,046**
i.e. a total of **\$6,438 notional** profit from 4 trades in the last 2 weeks#.

LCM and/or STE believe that the information contained in this letter was accurate at the time it was compiled.

Performance Caution: Direct investing in the stock market can result in financial loss. The past performance of STE products is not and should not be taken as an indication of future performance. Caution should be exercised in assessing past performance. STE's service, like all other financial services, is subject to market forces and unpredictable events that may adversely affect its future performance.

Jim Berg, John Atkinson and STE believe that the information contained in this document was accurate at the time it was compiled. However, results reflect absolute trading stop loss discipline. Any projections made in this document are estimates only and no representation is being made that any account will or is likely to achieve profits or losses similar to those shown. Stock tips, buy or sell recommendations are not provided in this document.

All case study trades are notional examples using reasonably attainable entry and exit points. Results reflect absolute trading stop loss discipline. Unlike an actual performance record, simulated results do not represent actual trading. Also, since the trades have not actually been executed, the results may have over or under compensated for impact, if any, of certain market factors, such as lack of liquidity
